

AI interviews are nothing like video interviews

Here's what every candidate needs to know
before they start talking.

HOW IT WORKS

It's a **real** conversation, not a recording

- 01** You get a link via **email or WhatsApp**. No scheduling. Complete it any time, 24/7.
- 02** The AI asks questions and **adapts in real time** — follow-ups based on your actual answers.
- 03** Interviews run **15–25 minutes** covering experience, competencies, and situational judgment.
- 04** A **structured scorecard** is generated. Recruiters review the shortlist — not hours of recordings.

COMMON MISTAKE

Don't memorise your answers

Unlike a video interview, the AI follows up on exactly what you say.

If you claim to have led a team of 15 engineers, expect:
"Walk me through a specific conflict you navigated."

Scripts backfire. The AI is listening for substance — concrete examples, real outcomes, honest reasoning.

Zero

unconscious bias

The AI doesn't see your name, face, accent, or background.

Your answers are evaluated on **content alone** — no snap judgements based on how you look or where you're from.

For APAC candidates especially: these systems are built to understand the full range of regional accents and natural speech patterns.

WHAT GETS YOU THROUGH

Specific beats polished

SCORES LOW

"I'm a strong communicator with leadership experience."

SCORES HIGH

"I led a 6-person team through a product pivot — here's what I did."

SCORES LOW

Keyword-heavy phrases with no outcome data.

SCORES HIGH

STAR answers — Situation, Task, Action, Result — with real numbers.

SCORES LOW

Vague answers that force the AI to keep probing.

SCORES HIGH

Honest, direct responses — including "I don't know, but here's how I'd approach it."

YOUR PREP CHECKLIST

7 steps before you start talking

- 01 Find a quiet room.** Close the door. Earbuds > speakerphone.
- 02 Check your connection** before starting. Mobile data if Wi-Fi is unreliable.
- 03 Re-read the job description.** Prepare 2–3 examples per key requirement.
- 04 Don't memorise scripts.** Understand your experience; speak naturally.
- 05 Use STAR answers.** Situation → Task → Action → Result. Be specific.
- 06 Speak at a natural pace.** Pausing to think is fine — not penalised.
- 07 Do a dry run.** Talk aloud for 2 minutes about your last role. That's it.

— TRY IT YOURSELF

Run your first AI interview in 10 minutes

Talvin AI lets you screen candidates 24/7 with adaptive voice interviews — no scheduling, no bias, just the best-fit shortlist.
