OFFSHORE HIRING

AI RECRUITMENT

You're spending 70% of screening time on the wrong candidates.

Here's the 5-stage offshore assessment framework that fixes it — and the numbers that prove it works.

Swipe to read

• THE PROBLEM

Traditional offshore screening is broken by design.

70%

of screening interviews conducted with ultimately unqualified candidates

7–9h

recruiter admin time wasted per hire on manual processes

Days

before top APAC candidates exit the market — and you've only just started screening

→ Swipe to continue

THE FRAMEWORK

The 5-stage offshore assessment framework

1 **Role-Specific Screening Criteria**
Define competencies, culture fit, and hard disqualifiers before you screen a single person

2 **Automated AI Voice Screening**
Replace manual phone screens — assess hundreds in days, not weeks

3 **Competency-Based Voice Assessment**
Score communication clarity, English proficiency, and problem-solving at scale

4 **Job Tryouts (Role Simulations)**
Realistic role tasks — predicts performance, reduces turnover by 30–45%

5 **Shortlist Delivery + ATS Integration**
Auto-populate Greenhouse, Ashby, Workday — zero manual data entry

→ Swipe to continue

STAGE 3

What you actually assess varies by role.

CUSTOMER SUPPORT / BPO

Communication clarity and live problem resolution under pressure

SALES / SDR

Persuasion technique and objection handling in real scenarios

TECH / ENGINEERING

Technical depth, structured reasoning, and architectural thinking

FINANCE / COMPLIANCE

Accuracy, regulatory knowledge, and attention to detail

→ Swipe to continue

• PROOF POINTS

Teams using this framework see it immediately.

5d

FINANCIAL SERVICES FIRM, SRI LANKA

Screened 150 candidates in 5 days — the same process previously took 4–5 weeks

80%

SOFTWARE COMPANY, SRI LANKA

488 resumes processed, 15 shortlisted — 80% reduction in time-to-shortlist

45%

COMPANIES USING JOB TRYOUTS

Up to 45% reduction in employee turnover when role simulations are part of screening

→ Swipe to continue

THE DIFFERENCE

Manual screening vs. structured AI assessment

WITHOUT FRAMEWORK

- ✕ 4–5 weeks to screen 150 candidates
- ✕ 7–9 hours of recruiter admin per hire
- ✕ Gut-feel decisions, inconsistent scoring
- ✕ Top candidates drop off before shortlist
- ✕ High turnover — role fit never validated

WITH AI FRAMEWORK

- ✓ 150 candidates screened in 5 days
- ✓ Admin automated — recruiters focus on decisions
- ✓ Consistent, criteria-based scoring every time
- ✓ Fast process keeps best candidates engaged
- ✓ 30–45% lower turnover with job tryouts

GET STARTED

Screen smarter. Hire faster.

Talvin AI gives APAC hiring teams the full 5-stage framework — AI voice screening, job tryouts, and ATS integration — from $175/month. Built for teams hiring 25+ people per quarter.
