

See the **job** before the offer.

Why the most predictive hiring tool
isn't an interview — it's a real scenario.

THE PROBLEM

Interviews test talking. Not **doing**.

Every candidate has a rehearsed answer for "how would you handle an angry customer?" Almost none of them have a good answer when the angry customer is real.

Static questions

The same script, every time. Candidates prepare for the interview, not the job.

No signal on performance

You learn who interviews well. You have no idea who can actually do the work.

70%

of screening interviews industry-wide end up run on candidates who turn out unqualified once someone talks to them properly.

HOW IT WORKS

A real scenario. Not another interview.

1

You configure the role scenario

Set the situation — a frustrated customer, a double-booked room, a time-sensitive delivery issue. Choose the AI persona that fits.

2

The candidate steps into it

They interact with Talvin's AI Persona in real time. No prep. No script. The same scenario every candidate faces — the same bar.

3

You see what they actually do

Structured output: how they handled pressure, what they said, what they prioritised. Evidence, not impression.

Powered by **AI Persona Technology** — dynamic, responsive virtual characters that adapt to what the candidate does, not a fixed script.

Meet the **personas**.

Dynamic AI characters built for APAC hiring scenarios — each with a distinct personality and pressure level.

Sally

PATIENT · METHODICAL

Best for customer service, front-desk, and onboarding scenarios. Gives candidates room to find their footing.

Bob

DIRECT · HIGH-PRESSURE

Best for sales, BPO, and fast-paced operations. Pushes back with realistic friction.

Lisa

ANALYTICAL · DETAIL-FOCUSED

Best for finance, compliance, and technical support roles. Asks follow-up questions. Doesn't let vague answers slide.

Configure **probe depth per question** (Low / Medium / High) so Sally goes deep on what matters and lighter on what doesn't.

THE NUMBERS

What actually changes.

30–45%

reduction in first-year turnover for
companies using Job Tryouts

87%

of candidates rate Job Tryouts "good" or
"excellent"

vs. 62% for traditional interviews

0.55–0.63

predictive validity — the highest of any
screening method

vs. 0.14 for unstructured interviews

41%

improvement in quality-of-hire within the
first 90 days

— NO RIP & REPLACE

Works in your existing stack.

Talvin sits on top of your ATS. Pulls candidates, runs the tryout, returns a scored shortlist — without touching your workflow.

LIVE INTEGRATIONS

How the handoff works

— GET STARTED

Put your next hire through a real scenario.

Set up a Job Tryout for any role in under 10 minutes. No vendor switch. No rip-and-replace.
