RECRUITMENT ROI · 2026

Most ROI math is borrowed

US salaries, US ATS stacks, US hiring volume — applied to a screening problem in Colombo or Manila. Here's the version that actually holds.

Talvin

THE REAL COST

Three numbers recruiters underestimate

65% of hiring delays come from slow screening and too many interview rounds. Recruiters lose 6.5–9 hours of admin per placement — scheduling, reminders, chasing notes. And 70% of screening interviews are with candidates who were never going to make the shortlist.

65%
of delays trace to slow screening

WHAT IT'S COSTING YOU

42%

of candidates accept the offer from whichever company responds first. Not the best offer — the fastest one. Every extra day your screening takes is a day you're losing strong candidates to whoever moves quicker.

Talvin

HOW THE MATH CHANGES

Pay for minutes, not seats

Most platforms charge per interview or per seat — built for low-volume Western hiring. **Talvin AI charges per minute of interview time.** An 8-minute technical screen plus a 10-minute culture-fit interview is 18 minutes billed. Not two separate interview fees.

Talvin

WHAT AUTOMATION RETURNS

3.2x–4.7x ROI in year one

Companies using Job Tryouts to test real performance before hiring see a 62% reduction in time-to-hire and a 41% improvement in quality-of-hire — inside the first twelve months.

ALREADY IN PRODUCTION

The numbers are real

A Sri Lankan conglomerate screened 150 candidates in 5 days — a process that previously took 4–5 weeks manually. A product engineering firm cut 488 resumes to 15 finalists in a week, an 80% drop in screening time. A major financial institution's pilot earned Board IT approval for enterprise-wide rollout.
