

One-way video is **costing** you talent.

Why APAC hiring teams are switching
from Spark Hire to Voice AI

THE PROBLEM

70%
wasted.

Over 70% of screening interviews are conducted with candidates who won't make the shortlist.

Your team is spending most of its screening time on people who were never the right fit.

STATIC VIDEO FAILS

Rehearsed answers $\neq$ real ability

- Candidates prep polished answers to 5 predictable questions
- No follow-up means vague answers slip through unchallenged
- One-way video measures how well someone rehearses — not how they think

Not retrofitted. Engineered for the region.

Western AI platforms degrade in accuracy for non-native English speakers.

Talvin is built from the ground up for APAC's linguistically diverse talent pools.

— HEAD TO HEAD

Voice AI vs. one-way video

FEATURE	SPARK HIRE	TALVIN AI
Follow-up questions	None — fixed script	Real-time adaptive probing
Runs 24/7	Candidate self-schedules	Hundreds simultaneous, fully automated
Shortlisting	Manual video review	AI-generated structured shortlist
Pricing model	Per seat subscription	Per-minute — scales with volume

— CANDIDATE EXPERIENCE

4.2 / 5

Average candidate satisfaction score
across all Talvin AI interviews —
in a region where candidate experience
directly shapes employer brand.

Spark Hire: not published.

— READY TO SWITCH?

Screen smarter. Hire **faster**.

Talvin AI replaces one-way video with adaptive Voice AI built for APAC hiring at scale.
