AI BIAS IN HIRING

Your AI interviewer is grading the camera. *Not the candidate.*

7 slides

01 — WHERE BIAS GETS IN

It scores the polish, *not the answer.*

Facial expression and tone scoring judges how someone performs on a webcam. If a vendor can’t explain a 6 versus an 8, you can’t defend it.

02 — THE APAC PROBLEM

The accent penalty *is built in.*

Models tuned for US and UK English mark down non-native speakers, whatever their skill. In APAC, that's most of your pipeline.

03 — WHAT FIXES IT

Same questions. Same time. *Same criteria.*

Consistency first. Then follow-ups that test substance, not stage presence.

04 — CANDIDATE EXPERIENCE & FAIRNESS

Built for how *APAC speaks.*

INTERVIEW SETUP · SALLY

Pace and accent	APAC-tuned
Question set	Identical per role
Scored on	What they say
Video capture	Optional, employer's call

Candidate Experience & Fairness

05 — THE OUTCOME

87% vs 62%

Candidate satisfaction with Talvin AI interviews, against traditional screening. Average candidate rating: 4.2 / 5.
